

8'x8' Gravity-Tube™ Anchor Instructional

Congratulations! Life Undercover® has just evolved. The revolutionary Gravity-Tube™ water anchor system adds up to 50lbs of anchor weight, just fill, fold and lock seal the tube then strap to the bottom of the center peak pole. The Gravity-Tube™ Anchor system provides the most efficient leveraged anchor. At the end of the day just pour out the water, rinse and dry tubes before storing.

Warning: 100 SQF models require a set of (4) Tubes!

Step 1: Fill the Gravity-Tube™ to 80% of capacity with water or sand.

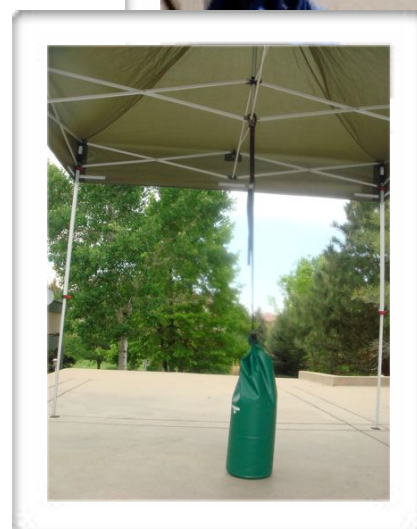

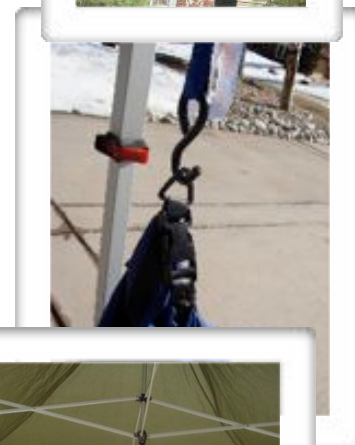

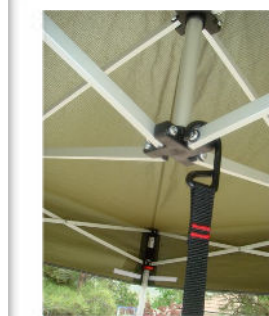

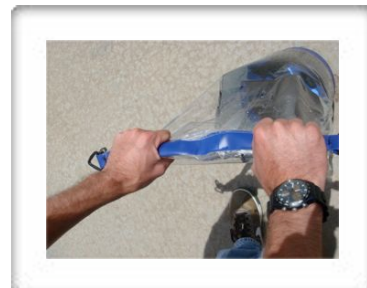

Step 2: Fold-over the open end three times tightly, then clasp latch.

Step 3: Place one hook of the strap on the bottom of the center peak-pole.

Step 4: Attach bottom of hook of strap to the tube d-ring of tube.

Step 5: With the tube sitting upright secure quick strap taugt.

Caution: Do not allow Gravity-Tube to hang from truss bars with out being grounded this will cause damage to the frame. Take down in winds greater than 15 MPH - Do not leave unattended for long periods of time.

(1) Tube is ideal for 64 SQF Sport-Packer™
